

MALDEX® O6S

Starch-Based Solution

Maldex® O6S starch-based solution is easy to use and available in powder form. This unique solution from Tereos expands your options and meets your consumers' demands!

Benefit from Outstanding Stability in Your End-Product

Today's consumers are looking for a healthier lifestyle, aiming to reduce sugar, fat and calories in their diet without compromising on taste. Tereos offers a wide range of sweetening and nutritional solutions, including bulking agents that positively impact taste, texture and mouthfeel sensation. Tereos' Maldex® O6S starch-based solution provides unique stability in your end-product, avoiding any haziness or turbidity when used in a liquid solution. Its neutral taste makes it an attractive binder for a broad range of applications, while actively supporting reformulation aimed at reducing fat, sugar and calories.

Unique Stability

- Easily dissolves
- Very low retrogradation
- No turbidity or haziness in liquid solution
- Ideal for cream liquor and sports drinks applications

Neutral taste carrier
