

Decarbonization

At Tereos, we are leading the way towards sustainable agriculture by implementing regenerative agriculture and low carbon emission practices. Our ambition is to **accelerate the reduction of our Greenhouse Gas emissions (GHG) activities to reach Net-Zero emissions by no later than 2050**, while helping our customers to meet their sustainability objectives. **Tereos is the first sugar, starch and sweeteners producer to have its Net-Zero plan SBTi FLAG-approved (Forest, Land and Agriculture)**, setting a new benchmark in the sector.

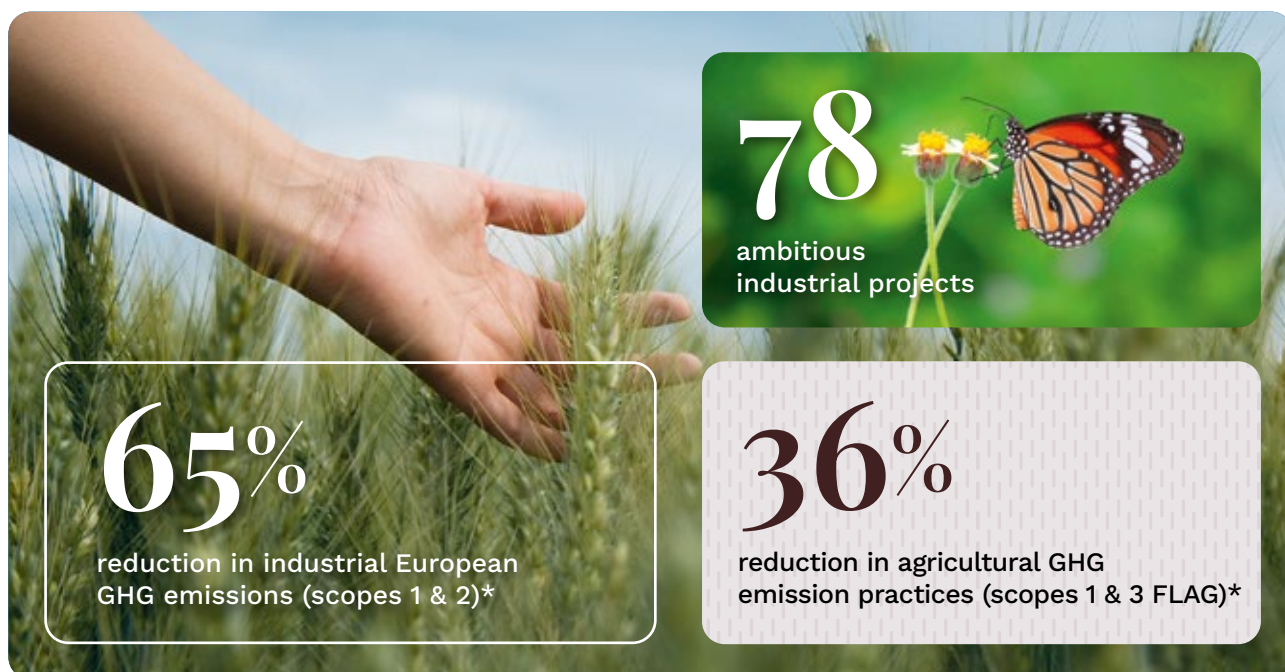

Our initiatives include:

€800
million investment in European industrial sites

The infographic features a blue background with a white dotted pattern on the left side. The text '€800' is prominently displayed in white, with 'million investment in European industrial sites' written below it in a smaller white font. The right side of the graphic shows a photograph of a lush green field in the foreground and industrial silos in the background under a clear sky.

“ To cultivate is to strengthen our connection with nature and protect our resources.

65%
reduction in industrial European GHG emissions (scopes 1 & 2)*

78
ambitious industrial projects

36%
reduction in agricultural GHG emission practices (scopes 1 & 3 FLAG)*

The infographic is set against a background of a hand reaching out to touch tall grass. It contains three data points: 1) A white box with a thin border containing '65%' and 'reduction in industrial European GHG emissions (scopes 1 & 2)*'. 2) A green box with a thin border containing '78' and 'ambitious industrial projects', accompanied by a monarch butterfly on a flower. 3) A grey box with a thin border containing '36%' and 'reduction in agricultural GHG emission practices (scopes 1 & 3 FLAG)*'.

* Data comparison 2023 vs. 2033

To support our customers in achieving their sustainability goals, we have developed a multilevel decarbonized offer that makes a significant environmental impact and contributes to a more sustainable world.

Our climate transition plan for the next decades is well-defined, marking a pivotal moment in our strategic sustainability journey and reinforcing our environmental commitment to the planet.

Tereos at a glance

Tereos is the leading global player in the sugar, alcohol, and starch markets, with recognized expertise in the processing of sugar beet, sugar cane, wheat, corn and alfalfa.

With close to **40 sites distributed across 15 countries**, we rank among the largest producers of **sugar** and **wheat protein** globally, and we are also one of the largest European producers of **ethanol** and **starch products**.

We are a cooperative group of over **10,000 growers** and around **15,000 employees**. Our mission is to provide solutions to our customers through a diverse range of products for various markets, including **food, energy, animal feed, green chemicals, pharmaceuticals, cosmetics, and paper & cardboard**. Our product line includes **sugar, sweeteners, starch** and its derivatives, **alcohol/ethanol, dietary fibre** and **proteins** and **seeds** for **animal nutrition**.

15,000

across **15** countries

A close-up photograph of a hand holding a mound of soil, with the soil falling in a stream. The background is a soft, golden sunset over a field of crops. The lighting is warm and natural, highlighting the texture of the soil and the skin of the hand.

“ We know what we owe to the earth, simply because our future depends on it.

“ Cultivating a shared future for the earth and mankind by meeting the essential needs of daily life... That is our purpose.

Customer Innovation Centre

At our Customer Innovation Centre located in Aalst, Belgium, we provide **solutions** and **advice to our customers**, while supporting and proposing future project developments. This is a cutting-edge facility designed to foster innovation and deepen collaboration with our customers by offering an extensive range of services. Structured by specialized teams, each one focusing on different areas such as **food, industry, paper & cardboard, pharmaceuticals, and cosmetics**, the site has newly established laboratories tailored to each industry, a state-of-the-art demonstration kitchen and extensively upgraded analytical technologies for each application.

“At Tereos we are passionate about innovation!”

300

active patents

150

customers

70

annual projects

Formulation or reformulation:

Formulating or reformulating food products to boost fibre content and/or reduce calories and sugar content, while enhancing improved nutritional labelling. Analysis on product taste and shelf-life properties, enabling the creation of new or improved ingredients.

Product development:

New food & industrial solution workshops.

Consulting/ technical support:

Proposals and advice adapted to customer and market needs.

Training:

Multiple products and applications such as confectionery, chocolates, dairy, bakery, cereal products, extracted food, paper & corrugates board, among others.

Analytical testing:

Physical measurements, sugar composition, sensory perception, shelf stability.

Tereos

Day by day,
cultivating the future.
